**Foolish Drivers Can Offset All Safety Devices in Automobiles**

HAIFA, Tuesday. — "If the average motorist knew automobiles as well as we who build them, and realized how slender is the chance on which his life and the lives of his passengers would be far more careful on the road than he is," Mr. Alex Taub, noted American automobile engine designer, declared in his parting message at the Technion yesterday.

"Just because there has been great progress in the design and manufacture of cars does not mean that they are foolproof," the engineer stated. "Automobile designers and manufacturers have placed in the cars every possible safety device, but some drivers are able to overcome these safety factors and make a mess of the road nevertheless. For example," he went on, "hitting a hole in the road is not merely a matter of shaking up the passengers. It also gives the car terrific punishment, and acts as if the vehicle had been hit with a mighty sledge hammer. When a 125 to 225 kilogram rear axle hits a 10 centimetre obstruction at 90 kilometres per hour, that axle hits the rear end of the car with a force of about 25 tons per second squared. That's some sledge hammer."

**8-Day Course on Co-ops For Israel Arabs**

The first eight-day intensive course for 40 secretaries and persons active in the cooperative movement among Israel Arabs was opened near Tel Aviv on Sunday by the Cooperative Societies Department of the Ministry of Labour.

The participants, most of whom come from agricultural cooperatives, represent 5,000 members of the 130 Arab co-operatives. They are to be instructed by eight lecturers, partly in Hebrew, on the foundations of the cooperative movements in the world and in Israel, co-operative laws, and problems of administration and bookkeeping. The participants are also to visit several well-established rural and cooperative establishments near by.

Five persons taking the course represent the Communist Arab Workers Congress; three the "Farmer Cooperative Union, which is affiliated with the Jewish Farmers Association, and 14 the Cooperative Union of Arab Workers, which is affiliated with the Histadrut.

**Reparations Goods Insurance**

A newly-formed pool of nine local insurance companies is negotiating with the Israel Government and the Purchasing Mission on its participation in the marine insurance of German reparations goods. The companies, all of whom deal with transport insurance, emphasized in their proposals the importance of a due share of the insurance business being received by Israel companies. It is believed that the premium income will total several hundred thousand dollars annually.

The plan of the local pool was formulated in accordance with the rules laid down in the official agreement in regard to transport and insurance.

**Memorial Service**

A memorial service for the personnel of the Hebrew University and Hadassah who were killed on the way up to Mount Scopus five years ago will be held at noon on Friday at Hadassah "D" (Bet Hagadol).

**University Can Play Important Role in Strengthening Economy**

Commenting on the future plans of the Hebrew University as announced at a recent press conference, "Omer" (Histadrut) says that these projects have been welcomed by the public. Recent waves of immigration have not brought as many scientists as the country needs to rely on the Hebrew University to provide a new generation of physicians, teachers, etc.

In the framework of these undertakings which are to be carried out with the help of the Government and the Jewish Agency, a new academic city will be built in the centre of Jerusalem. The existing departments will be enlarged and the library expanded. Six hundred thousand books have remained on Mount Scopus; meanwhile 250,000 have been collected in the new library in town, but this is not enough for scientific research work. "Omer" concludes by saying that the increase in labour productivity and the success of our work in general depends largely upon the activities of our institutions of higher learning, and first and foremost among them the Hebrew University.

**Atoms Successfully Generate Electricity**

OAK RIDGE, Tennessee, Tuesday. (Reuter). — The Atomic Energy Commission recently announced successful electric production from a new type of atomic furnace, "an important milestone" in the search for economical atomic-generated electric power.

The Commission said an experimental atomic pile at Oak Ridge National Laboratory produced 100 kilowatts of electricity in a test run lasting an average five-hour run.

**18 Families Await Homes As Rift Delays Repairs**

Eighteen Jerusalem families who were moved out of their apartments a month ago because of the faulty foundation of the building are still waiting for the Municipality and Custodian of Abandoned Property to decide who will carry out the work. The building, located at the corner of Herbert Samuel and Shalom Streets, was scheduled for "immediate repair." Traffic was barred by rows of stone-filled barrels but these were pushed aside a few days later.

The Custodian's office decided itself willing to bear the cost of the work, which will be more than IL6,000 including over IL2,000 paid by the tenants. But the office stated that since it lacked the necessary personnel for the Municipality and workers, the city should supply the needed engineer and workers. The city has refused, insisting that the Custodian should handle the entire matter.

**Israel Citrus Cannot Compete with Spanish**

TEL AVIV, Monday. — Mr. Ezra Ichilov, M.K., who recently visited Great Britain, France and Spain on a mission for the citrus industry, told the Executive of the Farmers' Federation here today that the citrus fruit would not be able to compete with Spanish fruit unless output was increased and labour costs reduced.

He said that one case of fruit in Israel paid for one worker, while in Spain a case covered the wages of about five. Citrus exports for the current season have been invited by the U.S. to take part in sessions of the commissions for climatology and synoptic meteorology of the World Meteorology Organization to be held here this spring.

**Israel Invited to Meteorology Panel**

WASHINGTON, Tuesday (U.N.A.). — Israel has been invited by the U.S. to take part in sessions of the commissions for climatology and synoptic meteorology of the World Meteorology Organization to be held here this spring.

**Passover Vacation**

March 22 — April 8  
is best spent by  
**CHILDREN OF HAIFA AT THE 14-DAY OUTDOOR RECREATION**  
arranged by MACCABIM, Haifa, under the supervision of the well known Gymnastics teacher J. Meisenger.

**"Seders" for Tourists**

in the Class 5  
**SAVOY HOTEL**  
The Service will be conducted by a well-known ENGLISH TOURIST CANTOR Under the Supervision of the Rabbi.

**Israel Softball League**

The Israel Softball League 1951 programme is scheduled to start at the end of April. All teams and clubs interested should contact Messrs. Levy, P.O. Box 202, Tel Aviv, before April 8. If sufficient entries are accepted from the Haifa area, the League will be subdivided into two sections, Northern and Southern Leagues. Individual players wishing to take part in the games should contact the above immediately.

**Cockell Outpunches Farr**

Don Cockell, former British light-heavyweight champion, defeated 39 year old former heavy-weight title holder, Tommy Farr, last Monday night at Nottingham, when the referee stopped the bout at the end of the seventh round because of Farr's badly cut left eye. The bout was staged as an eliminator for the British heavy-weight championship, held by Johnny Williams. Subsequently the British Boxing Board of Control approved a meeting between Williams and Cockell as a title fight.

Cockell was by far the heavier puncher and Farr, for all his experience and ringcraft, could not stand the hammer blows of his younger opponent. Farr, who was in the ring before Cockell was born, could not concede 15 years to a fighter who threw crushing punches, despite rolls of fat around his middle. But Cockell, who lost his British title last August, Farr once won a full 15 rounds against world champion Joe Louis for his heavy-weight title and relinquished his British championship as far back as 1937.

**Basketball Course During Pesach**

Maccabi are organising full scale courses for basketball trainers and players during the coming Pesach Holidays at Kiryat Motzkin and Tel Aviv. At the former venue, coaches and players from Tibersa, Bat Galim, Carmel, Kiryat Bialik, Zichron Ya'acov and Kiryat Motzkin will participate. The course will be under the control of Messrs. Yochanan Shoshani, Abraham Pessach, Ephraim Al-Lane, Mamaneh Kurman and Meir Magen.

**AT THE CINEMA**

"THE Wicked City" (Oran) (Haifa) is Marcelline. An American sailor (Pierre Aumont) is robbed at the end of an evening with the cabaret girl (Marie Monty). Here is another melodrama typical of classic French cinema but "The Wicked City" is an English language film made in France, does not reach such heights. An American speaking English with a French accent and Frenchmen using English as their normal language do not assist verisimilitude and, although there are interesting shots of Marcelline, they are not presented to the best advantage. No.

**AMAZING OFFER: SUMPTUOUS 2 1/2-ROOM FLAT in North Tel Aviv, on pillars, front FOR SALE or RENT**

The flat must be disposed of. M. ROMAS & CO. 8 Rothschild Blvd., Tel Aviv.

**Mark Ye Well Runs First in Santa Anita**

Calumet's Mark Ye Well won the \$100,000 Santa Anita Handicap at Arcadia, California, last week, to capture the classic for the Calumet Stable for the first time. Mark Ye Well beat Mr. Res Warner's Trusting by a nose, with Mr. Vanderbilt's First Chance, third.

A crowd of 50,000 watched the 16th running of the classic race, which had a field of only six starters. Mark Ye Well, carrying the top weight of 130 lbs. with Eddie Arcaro up, took the lead from the first stretch. He was a length ahead when Trusting made his bid, when it became a stride-for-stride finish. Going to the post a three to five favourite, Mark Ye Well earned \$97,000.

**CAMBRIDGE CREW IMPRESS CRITICS**

The Cambridge University boat race crew impressed river-side critics with the crispness and firmness of their rowing at Putney last early last week as they made their first appearance on tidal waters. They met Oxford University in the 99th Annual Boat Race on March 25 on the four and a quarter mile stretch of the River Thames. Oxford, who won last year's race by five feet in a snow-storm, are also at Putney. Both crews were on the water together during their morning warm-up but in the last stages of training, the coaches set the crew to work twice a day, but they invariably leave the river to each other.

## Mapai Names Peri As

## T.A. Deputy Mayor

Jerusalem POST Bureau

TEL AVIV, Tuesday. — Mr. Eliezer Peri, Director General of Amudim and a member of the directorate of Kupat Holim, has been named the Mapai candidate for the post of Deputy Mayor of Tel Aviv.

The election of the new Mayor, who will be the Acting Mayor Haim Levonon, and of his deputy, is to take place on Sunday.

A Deputy Mayor coming from the Histadrut block was agreed upon in the coalition agreement with the General Zionists. The agreement, which has now come into effect, also provides for a second Deputy Mayor from the right-wing faction. He is expected to be Mr. S. Shehant, a veteran councilor.

Negotiations are now in progress for administrative changes in the Municipality, mainly in regard to placing several Mapai men in key positions. The Council committees are also to be reorganized.

Mr. Peri served briefly as Deputy Mayor several years ago and served as Acting Mayor when Mr. Haim Rokach, then Mayor, went abroad before the establishment of the State. Mr. Peri is considered by Histadrut circles to be an expert on municipal affairs.

Improvements in State

Accountancy Accepted

Jerusalem POST Staff

Improvements in the government accounting system, recommended by the State Controller in his third Annual Report issued recently, are to be introduced in Jerusalem yesterday.

A three-man committee, appointed by the Finance Minister, Mr. Levi Eshkol, to work out details of the changes and improvements, is expected to complete its work this month.

The Controller's recommendations centered on three basic points: improvement in the "cash basis" by registering revenue and expenditure on the day on which payments are received or made in Governmental bookkeeping, and consistent adherence to the "accrual basis" by using a proper profit and loss accounting system in calculating accounts; and decentralization of bookkeeping and payments in Governmental departments. In addition, the Controller recommended improvements in the drafting of the State's budget and its construction.

It is understood that the introduction of these changes will be completed by the end of this month, and that the bookkeeping and accounting departments are to be established in each Ministry. The heads of these departments would be directly responsible to the Accountant-General in the Finance Ministry.

At present, each payment by a Ministry must be approved and released by the Accountant-General's Office; under the new system, each Ministry's account department would receive advance allocations which would be proportional to, and within the limits of, the Ministry's budget.

These Departments would be authorized to make payments within budgetary limits and would keep complete accounts of their financial transactions. Each Department will also submit a monthly report to the Accountant-General.

TRADE WITH U.K.

LONDON, Tuesday. (INA). — "Barclays Review" showed today that during 1952 Britain imported from Israel goods to the value of \$5,877,037 and exported to Israel \$8,290,837 worth.

In 1951 Britain bought from Israel goods valued at \$6,163,284 and sold to Israel goods to the value of \$11,708,196. In 1950, British imports from Israel totaled \$1,130,777, and exports \$9,423,217.

## 570 Families Win New Flats

Jerusalem POST Reporter

TEL AVIV, Tuesday. — Five hundred and seventy families who have hitherto lived in one room, many of them together with children and relations, today won the right to a two-and-a-half room flat, complete with all fittings, which will be ready in a few months.

The flats, built by Shikun, the Histadrut housing company, were drawn in a lottery among the 2,300 persons on the waiting list for Shikun's share of the Government's Popular Housing scheme. Most of them jammed into the Chel Shem Hall waiting for the results of the lottery.

The crowd which assembled at the hall this morning was a gathering of persons who had taken an hour off from work to come to the drawing. There were hundreds of bicycles outside the hall as well as hawkers' stands and carts of market porters, some of them owned by those who got their flats today.

One of the winners, Mrs. Itzhak Fritz, told THE POST that she came to Tel Aviv four years ago after years in a German concentration camp. Upon arrival, she and her husband received a room in Jaffa from the Jewish Agency. They are still living there, next door to a baby who had died.

Mrs. Fritz said they would start living again as they used to in pre-Hitler Germany. Mr. Fritz is a weaver. They had so far paid IL100 on registration and another IL400 later. They must now pay an additional IL150 before moving in. Another IL250 is a long-term low interest mortgage.

At the ceremony today, Mr. Leo Kadan, Director of Shikun, said that the company was constructing 2,000 flats, 1,100 in Tel Aviv and the rest in the suburbs. With his 23 years' experience in building, he guaranteed that the houses were of the first quality. He said that the second drawing in Tel Aviv was scheduled for this month. Half of those who had been waiting for the first drawing were from the Tel Aviv area.
